```

Figure 2: Valgrind result for assigning 1000 doubles without free memory

## Questions

- Do you see any memory leak in either or both scenarios?  
Yes. Both scenarios have memory leak.
- How much memory leak did you see?  
400 Bytes for 100 ints  
8000 Bytes for 1000 doubles
- Does the memory leak match with your allocations ?  
Yes. Each int is 4 bytes and each double is 8 bytes. Then, multiply by 100 and 1000. We will get 400 bytes and 8000 bytes for those cases.

## Check segmentation fault

### Scenario 1

**Malloc 10 ints and assign 1000 ints to the array**

```

==16947== Memcheck, a memory error detector
==16947== Copyright (C) 2002-2015, and GNU GPL'd, by Julian Seward et al.

$

```

*Figure 3: Valgrind result for allocating 10 ints and assigning 1,000 ints to this array*

## Questions

- What is the valgrind output?  
Because this scenario still doesn't free the memory so there are 40 bytes in block 1 loss. Besides, this time should have invalid write of size 4 because it writes outside the `int_arr`'s allocation.
- Can you run the program without any errors?  
Yes. That's because the program doesn't write the memory block that has been used yet.
- Try to increase the size of the iteration until you get a segfault. What happens when you run it independently and with valgrind?  
This time I increase the loop til 100,000. Then, run the program independently, and get the segmentation fault.

```
poren@burt-reynolds 13:01:23 ~/compsci250p/hw1
|$ g++ valgrind.cpp
poren@burt-reynolds 13:01:27 ~/compsci250p/hw1
|$ ./a.out
程式記憶體區段錯誤 (core dumped)
poren@burt-reynolds 13:01:29 ~/compsci250p/hw1
$
```

*Figure 3: Execution result for allocating 10 ints and assigning 100,000 ints to this array*

Now, run the program using Valgrind.

```

poren@andromeda-5 21:18:41 ~/compsci250p
$ ls
.git/ hw0/ hw1/
poren@andromeda-5 21:18:42 ~/compsci250p
$ cd hw1
poren@andromeda-5 21:18:44 ~/compsci250p/hw1
$ ls
a.out* dict.txt prof.cpp valgrind.cpp
poren@andromeda-5 21:18:44 ~/compsci250p/hw1
$ valgrind --tool=memcheck --leak-check=yes --show-reachable=yes --track-origins=yes a.out
